Higher Technician in Develop of Web Applications

Certificate of Higher Education (HNC) • (2017 - Unfinished)

Caritas (SGP)

Low voltage systems technician

Specific Professional Training • (2002 - 2002)

Trade School, Madrid (Spain)

Technician in Microcomputer Systems and Networks

Technician in Microcomputer Systems and Networks. • (2000 – 2001)

High School

High school diploma

High School • (1990 – 1996)

LANGUAGES

Spanish: Native Speaker

English: Professional proficiency

Certifications

Cambridge English Entry Level Certificate in ESOL International (Entry 3) *
Cambridge Assessment English BULATS CERF Level: B2

WORK EXPERIENCE

- **Capgemini for Airbus** - Madrid - Spain.

Sr. Systems administrator (CIS)

February 2023 – At present.

Senior Systems Administrator, currently part of the **CoreOps team** with a focus on **Wintel systems**, responsible for the comprehensive management of virtualized infrastructures and platforms. In charge of the implementation, maintenance, and evolution of projects, technical changes and tasks, as well as IT support and incident/request resolution for clients such as **Airbus AH, AC, OS4**, manufacturers, and strategic partners.

- Daily coordination with **Level 3 infrastructure administration teams** through meetings focused on continuous improvement, project tracking, and incident resolution.
- Participation in **on-call rotations** for the execution of scheduled changes, in collaboration with operations and technical teams.
- Diagnosis and remediation of **vulnerabilities (CVEs)**, assessing impact (CVSS) and applying workflows defined by the cybersecurity team.
- **Hardening, verification, and technical support** in migration processes to the **VMware Next-Gen Platform (NGP)**.

- **Saint-Gobain Mediterranean Countries** - Madrid - Spain.

Technical Administration Manager TAM

February 2023 – July 2023.

International scope (Saint-Gobain Mediterranean countries), working in both languages Spanish and English.

Responsible for the management and maintenance of infrastructure projects and virtualized platforms, also support and solution of requests and incidents from

users and partners.

Implementation of tasks and projects assigned by the infrastructure director or by business needs, as well as asset management.

Working directly with Saint-Gobain (SGTS).

Technologies:

Microsoft Technologies: Active Directory, PowerShell, WSUS, Windows Server (2008, 2012, 2016, 2019), IIS.

VMware: vSphere, vCenter, ESXi.

Red Hat OS (Several versions), Satellite 6.

Storage arrays: NetApp (FAS2700).

Backup Solutions: Veritas NetBackup OpsCenter, Administration Console.

Cybersecurity: Monthly patching of servers according to vulnerability analysis reports (Cyber Security Bulletin) in Red Hat OS and Windows Server environments.

ITSM:

ServiceNow.

- **CGI.**

IT Platform Services

March 2022 – February 2023.

IT Platform Services & Security Team, Systems Administrator.

The main project is the management, automation and deployment of patches, updates and applications.

Third-party applications patch and update management.

Creation of vulnerability reports (CVE) identifying their main characteristics and impact (CVSS) exposing the proposals provided by the Microsoft Security Response Center Solution Integration (MSRC).

Working for an insurance company.

Tools:

Microsoft Technologies:

-Active Directory, PowerShell, Hyper-V, WSUS, Windows OS 10/11 Pro/Enterprise and Server (2008, 2012, 2016, 2022) Environment, Local Administrator Password Solution (LAPS).

Management and patching tool:

-Ivanti.

Other tools:

-Vmware vSphere.

-Entrust Identity.

-Latch (OTP).

Ticketing tool:

-IBM Control Desk

- **Everis for EMA (European Medicines Agency)** - Madrid - Spain.

Sr. Systems Administrator, L3 Server, and Storage Team (L3SST)

August 2021 – October 2021.

Telecommute job.
